Figures are for comparison purposes and may not reflect real life driving results which depend on a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load. They were obtained using a combination of battery power and fuel. The BMW 530e and 530e xDrive Saloon are plug-in hybrid vehicles requiring mains electricity for charging. All figures were determined according to a new test (WLTP). The CO_2 figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicle tax on first registration.
