Key  
\* = These figures are for comparison purposes and may not reflect real life driving results which depend on a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load. For plug-in hybrid vehicles they were obtained using a combination of battery power and fuel, for battery electric vehicles after the battery had been fully charged. Plug-in hybrid and battery electric vehicles require mains electricity for charging. The fuel consumption, CO<sub>2</sub> and electric range figures were determined according to a new test (WLTP). The CO<sub>2</sub> figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicles tax on first registration. Only compare fuel consumption, CO<sub>2</sub> and electric range figures with other cars tested to the same technical procedure.    ^ = Wheel cluster 1 consists of the following 18" wheels: 23G, 2WS, and 20" wheels: 21H, 24N, 27Z, 2T3.    † = Wheel cluster 2 consists of the following 19" wheels: 23K, 24L, 21F.    † = Figures not available at time of publishing.
