**EXHILARATE** every moment. From the battle cry of the legendary 323hp naturally aspirated V6 to the world's first rev-matching manual transmission. The relentless cornering grip of a dynamically balanced chassis talking to you through a driver-focused cockpit. Savour the feeling that only the legendary Z can bring to **YOUR DRIVE**.

## IT'S NEVER BEEN VERY GOOD AT BLENDING IN

Since its introduction, the Z has caused a commotion, rewriting the rules of sports cars in terms of style, performance and value.

#### Experience the Connection

Lightweight wheels and suspension help to provide an instant response to driver commands, connecting you to the road.

#### Enjoy Every Mile

Cross braces in the engine and cargo compartment add structural rigidity, allowing the suspension to act more precisely.

#### Stay in Control

An aluminium hood reduces weight on the front end, enhancing steering response.

#### Feel the Power

Carbon-fibre composite driveshaft lets the engine rev more quickly.

## TUNED TO PERFECTION. EVERY INCH OF IT

The short wheelbase for a quick response, the wide track for stability, the low centre of gravity to connect you to the road; the Z has an intrinsic beauty that's born of function, then shaped with passion.

## LEGENDARY POWER

The 370Z is powered by a naturally-aspirated V6 petrol engine. With 3.7-litre displacement for massive muscle, this 323hp dynamo features advanced Variable Valve Event and Lift (VVEL) technology that continuously tunes valve lift and timing for a quicker response and a broader torque curve, while optimising fuel efficiency and reducing emissions. Sounds impressive? Check it out. The exhilaration from idle to the 7,500-rpm redline – on the straights or through the corners – is pure magic.

## THE DRIVER FIRST AND FOREMOST

Ergonomically designed controls so everything you need is easily within reach. A driver's seat with special cutaways that give arms and legs room to move. From the moment you get in, you can tell - the Z interior has been custom-tailored to give you the drive of your life.

**NISSAN SYNCHRO-REV MATCH 6-SPEED MANUAL**  
**A MATCH**  
**MADE IN DRIVING HEAVEN**

Synchro-Rev Match gives you the shifting skills of a pro for a smoother, controlled drive, from your favourite twisty road to your daily commute. It makes up- and down-shifts so smooth, it would make an automatic jealous. And for 2018, every Z with manual transmission enjoys a new EXEDY® clutch\*, for reduced pedal effort and enhanced precision and control. With over 65-years of excellence, advanced engineering, and patented innovations, EXEDY® is the undisputed world leader of performance sports and racing clutches.

**LIGHTWEIGHT SUSPENSION COMPONENTS.** The lighter a suspension's components, the more quickly it can react to the driver and the bumps in the road. Use of strong yet lightweight aluminium makes the Z suspension extremely responsive. Its double-wishbone front and 4-link rear design helps to keep the tires vertical to the ground, maximizing their grip. Dual flow-pass shocks enhance control, and super-light forged 19" alloy wheels are available for even quicker response.

**4-PISTON BRAKE CALLIPERS ON 355MM FRONT ROTORS.** Balance doesn't just apply to cornering, it's just as important when braking. Bringing the powerful Z to a halt are its largest brakes ever - 355mm front rotors, with the gripping power of 4-piston front callipers. Purpose-designed ducting helps to reduce fade and provide predictable and precise stopping power.

**VEHICLE DYNAMIC CONTROL.** A great sports car shouldn't just exhilarate, it should also inspire confidence. Vehicle Dynamic Control (VDC) on the 370Z continuously monitors the speed of each wheel, steering angle, yaw, lateral G-forces and even braking pressure. It compares the data to the steered vehicle path and, if it senses the onset of understeer or oversteer, VDC brakes individual wheels and/or reduces engine power to help keep you on your steered course.

## EQUIPPED TO BE EPIC

At every corner of the 370Z, you've got components that have been chosen through thousands of miles and thousands of test hours in the most gruelling high-performance conditions imaginable. Each part alone is an exquisite virtuoso, but put together creates a performance of epic proportions.

## PERFECT BALANCE AT THE PERFECT POINT

Some consider a static 50:50 balance to be the perfect weight distribution for handling, but Nissan engineers realised that something closer to a 55:45 front:rear static ratio is actually ideal for the Z. As you reach the centre of the turn - the apex - increased power shifts the balance towards the rear-driven wheels, creating a near 50:50 balance in motion. This translates into enhanced tire contact for better acceleration, quicker turns, and a handling feel that's uniquely Z.

# 339 HP

**Competition-tuned handling. Competition-inspired design.** Serious grip starts with specially tuned springs, shocks, and stabiliser bars designed to satisfy the most demanding enthusiast. Extra braces on the front strut tower bar and special vibration dampers on the front body frame rail and rear sub-frame are added for impressive overall body rigidity and the feel of a controlled ride. A true work of performance art, the 370Z NISMO entices the eye with its 19" RAYS® forged alloy wheels, high downforce body, aggressive front and rear fascia, and rear diffuser.
